

hinged flap signs

hinged flap signs

Our new flap signs are designed with safety in mind

- Hinged flap signs are ideal for off-network diversion routes
- Permanent quality signs.
- Multi message signs displaying alternative messages eg other diversion routes.
- Up to 3 flaps may be added per sign plate. Flaps are interchangeable.
- All components are made from stainless steel, preventing corrosion and seizure.
- All designs are bespoke, please contact us for a quote.

Flap sign variants:

Although each sign is bespoke and tailored to meet specific requirements, they are generally made to the following specification:

Sign facing: 3M Diamond Grade Cubed or High Intensity Prismatic.

Sign plate: Aluminium, though many now prefer our NEW composite material, MP GRP, which has no scrap value & thus deters theft.

Sign components: All stainless steel components: U-bolts, hinges, anti-luce clips & shepherds crooks.

For signs below 1200mm in height, a single anti-luce clip at the base of the sign will be used, as shown in photo (top right).

For signs above 1200mm in height, the 'shepherds crook' will be used to secure the top of the flap, with anti-luce clips securing the bottom. This removes any risk associated with difficult-to-reach clips at the top of the sign.
