Morelock House, Strawberry Lane,
Willenhall, West Midlands, WV13 3RS

We were the first UK
sign manufacturer
to offer CE marked
traffic signs

Morelock signs are a British owned, industry leading organisation in the design, manufacture and installation of advanced signage for the road safety market, with our aim to help increase safety on public highway and private sites alike. Our comprehensive range of traffic signage products educates drivers to improve practices.

We are able to offer a complete service from consultation to design, manufacture and installation.

Our certificate of Conformity is testament to our significant achievement in gaining CE marked accreditation and our ongoing commitment to remaining one of the leading suppliers of traffic signs in the UK.

Innovation

We recently produced “Slow down, my daddy works here” which is a successful road safety campaign launched across the M60 & M1 motorways, the ‘My daddy works here’ campaign utilizes pictures of the children whose parents are working on the site blown up onto large roadside signs with just the words ‘My Daddy/Mummy works here, take care within the roadworks’.

The Morelock signs are erected behind safety barriers remind both workers and motorists alike to think about the people working behind the barriers as they drive through the roadworks.

With a clear emphasis on collaboration, Morelock Signs intend to provide a collaborative centre of excellence which will enable Morelock Signs to become recognised as the go-to place for expertise in the intelligent signage.

Our experience, knowledge and resources ensure that we can deliver your requirements at a price, service and quality that will exceed your expectations.

School Signs

Morelock signs manufacture a range of fixed plate signage and new technology signs including “20 when lights flash signs”, these signs are designed to complement existing school signage ensuring drivers are aware and reduce their speed when approaching schools during school hours.

Features & Advantages

- ▶ Installs easily onto any new or existing sign post
- ▶ High intensity LEDs command attention day and night
- ▶ Can be programmed to operate continuously or using a digital time switch that activates the sign only when it is needed, during term time at the start and finish of the school day.
- ▶ Heightened driver awareness

Application

- ▶ Applied to any fixed plate warning sign
- ▶ High incident intersections
- ▶ Rural roads
- ▶ Industrial site safety

Sign Fixing

Sign fixings refer to the method of erecting your sign. There are several different fixing methods available depending on where your sign needs to go. Generally, permanent traffic signs are post mounted, so are supplied with channel (or T-section for flag-type signs). Temporary traffic signs have a wider range of uses so can be mounted in a variety of ways: from frame-mounted roadworks signs to post-mounted or strap sign.

Installation

With a view to provide the complete traffic signage solution, Morelock Installations offers a professional qualified sign installation service. Other areas of expertise include asset management, data collection, site surveys and sign cleaning.

- ▶ Design, provision and installation of traffic signs using concrete foundations or sign screws an alternative based on application.
- ▶ Supply and installation of a wide range of traffic sign supports including passively safe posts.
- ▶ Detailed asset management surveys
- ▶ Sign maintenance and cleaning
